

Biota Neotropica

an historical of transformations

Tiago E. M. Duque Estrada

Assistant Editor of Biota Neotropica

BIOOTA

About

- BIOTA NEOTROPICA is an electronic, peer-reviewed journal edited by the Program BIOTA/FAPESP: The Virtual Institute of Biodiversity. This journal's aim is to disseminate the results of original research work, associated or not to the program, concerned with characterization, conservation and sustainable use of biodiversity within the Neotropical region.

Partnership with SciELO

- Biota Neotropica has entered SciELO system in 2006

The screenshot shows the Biota Neotropica journal website. At the top left is the SciELO Brazil logo. To its right are search boxes for 'issues' and 'articles search', followed by navigation buttons: 'all', 'previous', 'current', 'next', 'author', 'subject', 'form', 'alpha', and a search icon. Below the SciELO logo, it says 'Updated on May 06, 2014' and offers language options: 'Português' and 'Espanol'. A 'submissão online' button is also present. A navigation menu includes links for 'journal's site', 'about the journal', 'editorial board', 'instructions to authors', 'subscription', and 'statistics'. Below this is a Scimago section with a table of indicators for the years 2005-2012.

Indicator	2005-2012	Value
SJR		0.36
Cites per doc		0.56
Total cites		296

www.scimagojr.com

At the top right of the main content area, the journal title 'biota neotropica' is displayed in orange, with the ISSN 1676-0611 below it. The central image features the Biota logo (a green bird) and the text '+10' above a photograph of a small white flower with green leaves growing on a mossy rock.

Partnership with SciELO

- Since 2013 SciELO controls submissions and desktop publishing of our manuscripts.
- Joined Web of Science in 2008
- SJR = 0,363
